

Proteus Lite System

Minicam's Proteus™ Lite brings together, the tried and trusted performance and reliability of the Proteus family, in a value for money, entry level system. Proteus Lite is the ideal starter kit for a one-man operation, integration into a small inspection van, or a low-cost option for larger companies to use for off-road, remote locations. Proteus Lite provides all the resources required to undertake efficient, easy to perform inspections, and with ProPIPE+™ and WinCan® Embedded software as standard, you can deliver accurate, detailed reports, instantly on-site. The system comprises a CCU208 Control Unit, RMPL250 Reel, CPL150S Crawler and CAM026 Camera.

Compact, space-saving design, robust construction with a powder coated finish, and equipped with easy-to-use features including a manually operated cable layering arm and meterage roller, which is easily removed for cleaning. The friction brake can be fully locked, unlocked or applied as a friction brake to avoid unwanted pay-off of the cable, and a sturdy winding handle folds away neatly to save space. The cable reel comes complete with 250 metres of 6.8mm Kevlar reinforced cable with a weight of 5.5kg per 100m and a breaking strength of 500kg, and sports our signature "cow-horn" CCU locators, enabling a secure quick fit of the Proteus Lite control unit ready for work. For added flexibility an optional Tilt Table allows adjustment of the control unit position, to give the user optimal screen viewing and keyboard positions.
