

CABLE REELS

Automatic Reels

Minicam's ACR-HD cable reel has been upgraded to work with our new CRP140-HD crawler and CAM090-HD camera to deliver full, 1080p, HD video over the same 6-core copper cable used in our other cable reels.

Our high-bandwidth solution delivers clear, low-latency 1080p HD video over up to 500 m (1,640 ft) of cable. The new HD cable reel features the same bi-directional, powered winding and multiple operating modes as our existing ACR. The operator can select the appropriate mode to match their workflow, whether it be pay out and rewind assist, pay out assist only, or disabled automatic winding. Finally, the ACR-HD's multi-function Bluetooth controller allows you to operate the cable reel remotely.

The ACR-HD cable reel is available in two lengths: 350 m (1,150 ft) or 500 m (1,640 ft).
